Revised Fall 2017
INTRODUCTION
This handbook augments the Brookline College catalog and serves as a source of important information for students in the nursing program. It will inform you about important Nursing Department requirements and describe expectations of nursing students. It is a reference source for information about academic requirements, Nursing Department policies, and students’ rights and responsibilities.

The information contained in the Nursing Student Handbook is subject to change at any time. Students will be notified of changes through classroom announcements, email, the Nursing Department communications board, and on the Nursing Department website.

Brookline College History
Brookline College was originally incorporated and licensed in Arizona on October 18, 1979 as Arizona Institute of Business and Technology (AIBT), a non-profit business and technical school. The institution was accredited in 1982 by the Association of Independent Colleges and Schools (now the Accrediting Council for Independent Colleges and Schools, ACICS). In 1999, ACICS awarded AIBT Junior College status and granted approval for the institution to offer the Associate degrees at all campus locations.

In 2001, AIBT was awarded Senior College status by ACICS and received approval to offer Bachelor of Arts degrees via online delivery. In 2002, Arizona Institute of Business and Technology became International Institute of Americas (IIA) and opened a campus in New Mexico.

The planning of the Nursing Department began in 2001 culminating in its provisional approval by the Arizona State Board of Nursing in 2004. In 2004, IIA also received formal approval from ACICS to award an Associate of Arts degree in Nursing. Subsequently in early 2005, IIA officially opened its Nursing Program at 43rd Avenue and Bethany Home Road as part of the Phoenix Campus. The School was initially named after Ms. Ethel Bauer because of her tireless work in education and her passion to provide opportunities for others to advance their careers. The Ethel Bauer School of Nursing is now known as the Brookline College Nursing Department.

In July 2007, the Hamilton White Group IIA, LLC (now Brookline College, LLC) purchased the assets of IIA, and changed the school's name to IIA College in March 2008. In June 2009, the institution was renamed Brookline College.

In June 2010, Brookline College received approval to offer baccalaureate degrees via residential and online delivery. In June 2011, Brookline College received approval to offer master degrees via residential and online delivery.

Accreditation and Approvals
Brookline College is accredited by the Accrediting Council of Independent Colleges and Schools (ACICS) to award certificates, diplomas, associate’s degrees, bachelor’s degrees, and master’s degree. Brookline College is licensed and approved to offer the nursing programs by the following state agencies:

- Arizona State Board of Nursing
- Arizona State Board for Private Postsecondary Education
- New Mexico Board of Nursing
- New Mexico Higher Education Department

Revised Fall 2017
The Brookline College – Baccalaureate (BSN) nursing programs have been granted initial accreditation by the Accreditation Commission for Education in Nursing (ACEN) (3343 Peachtree Road NE, Suite 850; Atlanta, Georgia 30326; 404-975-5000; www.acenursing.org).

The baccalaureate/master’s nursing program at Brookline College is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, and (202) 887-6791.

**Brookline College Mission Statement**
Brookline College is an independent, accredited institution dedicated to meeting the educational needs of a developing multicultural society. The institution is committed to preparing students academically and professionally to meet the constantly changing employment requirements of business, industry, public service organizations, and medical support agencies functioning in a highly advanced and expanding technological community.

**Brookline College Objectives**
The objectives of Brookline College are to:
1. Provide comprehensive, concentrated, qualitative educational programs, which will guide students through the development of the competencies needed to meet the employment requirements in a highly technological environment.
2. Provide services that will support a diverse student body in their pursuit of postsecondary education on a variety of levels and eliminate the barriers to the completion of their educational objectives.
3. Provide innovative approaches and methodologies in a non-traditional educational environment emphasizing a multiplicity of skills.
4. Recognize and integrate lifelong learning and academic experiences as they would apply to each student's program of study.
5. Provide students with access to faculty members whose academic qualifications and practical experience will provide the valuable leadership necessary to prepare students for successful integration into the workplace.
6. Provide learners with the academic, cognitive, and professional skills necessary for career advancement.
7. Provide all students with a hands-on working knowledge of information technology procedures and applications.

**Bachelor of Science in Nursing (BSN) Program Mission Statement**
The mission of the Nursing Department is to prepare highly competent professional nurses to address complex human needs within a multicultural environment that will improve the health of individuals, families, and communities through the discovery and dissemination of nursing knowledge and the translation of science into practice. Faculty facilitate the education of students in the art and science of nursing to provide ethical, holistic, culturally competent, evidence-based care in collaboration with other members of the healthcare team in a variety of health care settings within a constantly evolving health care environment. Students, as members of the community in which they receive their education, are stakeholders in the health and welfare of the community they will serve.

Revised Fall 2017
BSN Outcomes
The Nursing Department has seven (7) student learning outcomes that are derived from the College-wide learning goals, Department mission and philosophy, and professional standards of practice. The graduate of the BSN program:

1. Utilizes the nursing process and critical thinking as tools to make culturally-sensitive patient-centered clinical decisions in all health care settings within systems-based environments.
2. Collaborates with patients and other members of the healthcare team in the planning, coordination, and provision of competent care.
3. Integrates evidence-based findings into nursing and collaborative practice.
4. Promotes patient and staff safety utilizing the process of quality improvement based on available evidence.
5. Uses information and technology for communication, knowledge development, and clinical-decision making.
6. Demonstrates leadership behaviors and professionalism when providing care to patients across the lifespan in all health care settings.
7. Integrates legal, ethical, and professional standards into nursing practice.

The Nursing Department has established five (5) BSN program outcomes. These are:

1. NCLEX pass rates: Graduates will achieve a first-time NLCEX-RN pass rate above the national average.*
2. Program completion: 75% of students enrolled in the program will graduate within 150% of the published program length.
3. Program satisfaction: 85% of graduates will agree or strongly agree they are satisfied with the BSN program.
4. Employer program satisfaction: 80% of employers will agree or strongly agree they are satisfied with graduates’ competencies.
5. Post-graduate activity: 80% of program graduates who pass the NCLEX examination will be employed as registered nurses within twelve months of graduating or will be enrolled in a graduate program in nursing.

*Students in the BSN/RN track are already licensed as registered nurses and therefore outcomes of NCLEX pass rates are not evaluated for this track.

Master of Science in Nursing (MSN) Program Mission Statement
The mission of the Brookline College graduate nursing program is to provide students with the knowledge and skills needed to build upon and advance their nursing practice. Students will learn to apply advanced philosophies, theories, concepts, research findings, and skills to specialty practice. Graduates of the program will be equipped with the knowledge and competencies to assume roles as nursing leaders in multicultural healthcare and academic settings.

MSN Outcomes
The Nursing Department has identified six (6) graduate-level Student Learning outcomes that are derived from the College-wide learning objectives, Graduate Nursing mission, Department philosophy, and professional standards of practice. The graduate of the MSN program:
1. Synthesizes concepts from nursing and other disciplines to build upon and advance professional nursing practice.
2. Integrates evidence-based advanced knowledge and skills into specialist nursing roles.
3. Utilizes technologies that support specialist nursing practice through critical thinking, decision making, and interprofessional collaboration.
4. Demonstrates the use of leadership strategies that advance the design, implementation and evaluation of specialist nursing practice.
5. Functions effectively as a change agent, member and leader of interprofessional teams to influence healthcare and nursing practice for individuals, families, populations, and systems.
6. Analyzes the impact of social, political, economic, and technological trends in healthcare on nursing practice and healthcare delivery.

The Nursing Department has established five (5) MSN program outcomes. These are:
1. Program completion: 75% of students enrolled in the program will graduate within 150% of the published program length.
2. Graduate program satisfaction: 85% of graduates will express they are satisfied or highly satisfied with the MSN program.
3. Employer program satisfaction: 80% of graduates’ employers will express they are satisfied or highly satisfied with graduates’ competencies.
4. Job placement rates: 90% of program graduates will be employed in a specialty nursing role within 12 months post-graduation.
5. Professional achievement: 85% of program graduates will engage in continued professional growth through membership in professional organizations, continuing education, specialty certification, and/or doctoral study in nursing.

**Nursing Department Philosophy**
The Nursing Department philosophy is consistent with the mission statement of Brookline College and serves as a link between the Nursing Department and the college as it carries out the mission through the nursing curricula. Nursing Department faculty will regularly review and revise the nursing philosophy and program outcomes.

The Nursing Department believes nursing is a professional, scientific discipline with academic and practice dimensions. The discipline has as its primary focus the maintenance and promotion of health achieved through collaboration with individuals, families, groups, and the community in a manner that is consistent with society’s expectations and needs. The Nursing Department believes the baccalaureate level to be the essential educational preparation for professional nursing practice. Nursing should achieve higher levels of education and practice to the full extent of their education and training.

The theoretical underpinnings of professional nursing practice derive from the related disciplines of the natural sciences, social sciences, and nursing. The profession of nursing builds its knowledge base through the rigorous scientific inquiry of theory and practice that continues the process of theory development and provides the foundation for evidence-based practice. The nursing process establishes the foundation for critical thinking and decision making skills that allow complex independent judgments to be made based on available data and knowledge.

Revised Fall 2017

7
Nursing competencies are guided by professional standards and include psychomotor and interpersonal skills, collaboration, and leadership using the processes of critical thinking, problem solving, and decision-making. Advocacy and caring are cornerstones of the role of the professional nurse who acts on behalf of individuals, families, communities, and global populations.

Nurses work autonomously within a defined scope of practice and collaboratively with members of the health team. Regulations and standards, such as those defined by state Boards of Nursing, the Scope and Standards of Practice, and the Code of Ethics for Nurses guide nursing practice as nurses are accountable to the public they serve.

Scientific and technological advances and the increasing incorporation of nursing research into practice mandate involvement in lifelong learning. Commitments to continuous quality improvement, improved patient outcomes, enhanced patient safety, and active involvement within the profession are key elements in professional nursing.

**Nursing Metaparadigms**

**Patient**
The patient is the recipient of nursing care and may be a person, family, group, and/or community, each moving through its own unique developmental stages. The recipient of care may be conceptualized as holistic, encompassing personal, social, and physical dimensions. Patients are persons with unique lifestyles, knowledge, beliefs, values, needs, and goals who interact dynamically with their environment, respond to health issues in individualized ways, and can make critical choices. They have a right to participate collaboratively with nurses in decisions and have shared accountability for outcomes. The role of the professional nurse is to foster health promotion activities and to assist the patient/person in optimizing wellness, including identifying and utilizing resources within all healthcare settings.

**Environment**
The environment comprises both the internal and external contexts of the individual and involves dynamic forces which affect the health status of the patient. The environment includes forces that are physical, cultural, social, political, economic, and spiritual. The larger society is a network of relationships that link individuals in families and groups. Individuals, as open systems, are in constant interaction with the environment in a dynamic, mutual exchange. Professional nursing practice considers the impact of the sociopolitical, legal, ethical, and economic forces on persons, families/groups, and communities.

**Health**
Health may be defined as the state of well-being at a given point in time for a patient. It is a multidimensional adaptive state within a constantly changing environment, characterized by wellness, illness, disease, or dysfunction. Health influences and is influenced by the patient’s developmental level. It is both objective and subjective and encompasses physical, psychosocial, and spiritual dimensions. Health is a relative state with parameters that may be defined differently by diverse cultures. Patients have responsibility for their health status through the health choices they make. The role of the professional nurse is to foster health promotion activities and facilitate adaptation.
Nursing
Nursing is a professional, scientific discipline with academic and practice dimensions integrating theory and practice. The science of nursing is the generation and application of a body of theoretical knowledge to health care situations. The art of nursing is the synthesis of theoretical knowledge and the experience of skills learned, translated into competent practice. Nursing care is patient-centered and provided to patients/clients in a wide range of health care settings with the goal of assisting them to achieve maximal health through interventions derived from evidence-based practice.

Educational Philosophy
The faculty of the Nursing Department believes that teaching-learning is a continuous, dynamic, and reciprocal process that varies with learner-centered, student encounters according to individual student needs and differences. Nursing Department faculty embrace and subscribe to development of a spirit of inquiry and the ability to think critically in all students as these are essential attributes for all professional nurses. Faculty pride themselves in promoting and facilitating student-centered learning that leads to student self-actualization. This process of fostering and promoting student-centered learning is a foundational and fundamental responsibility of nursing faculty.

There is emphasis on the teaching-learning process as a component of the professional nurse role and students are encouraged and engaged throughout the nursing curriculum to move toward becoming contributing and accountable members of the nursing profession and of a global society. Evaluation is a strong thread of the Nursing Department and there is evidence of this thread at all levels of the program, focusing on continuous quality improvement of the program against professional nursing standards and national benchmarks guiding nursing and healthcare delivery in a complex society. Systematic evaluation is conducted regularly by faculty, students, and others involved in the learning process.

Educational Process
Nursing Department faculty believe the goal of the educational process is fourfold, to:

• Help a highly diverse student body become liberally educated professionals.
• Afford students an opportunity to explore and develop a personal philosophy of nursing that is built upon a sound theoretical foundation and incorporates practice elements into a seamless continuum of “embodied know-how”.
• Achieve a balance between theory and practice to achieve fully, dimensional learning.
• Teach students to value the research process as one that builds on and adds to the foundation of nursing and health care knowledge.

Academic Environment
Nursing Department faculty believe in a learner-centered, facilitative academic environment that delivers nursing education to a diverse student body based on four values:

• The educational process partners students and faculty in collaborative mentoring relationships that transcend traditional educational boundaries.
• The infrastructure aids flexible educational efforts rather than having the infrastructure dictate the education that may be offered.
• There is a synthesis of conceptual and theoretical information with the practical realities of the current healthcare environment.
• Higher education is made accessible to students who are adult learners, who may have families and who may choose to work.

Nursing Department Values
The Nursing Department faculty believe in the following eight values on which all nursing education is based.
• Treat students as we treat each other, with genuine interest, egalitarian respect, and positive but realistic expectations, all based on honest and open communication.
• Be committed to changing people’s lives and facilitating students’ desire to achieve an education, with a focus on living, learning, growing, and achieving.
• Be dedicated to providing education with passion and inspiration in a way that instills a commitment to lifelong learning.
• Participate in out-of-class teaching and mentoring, whenever and wherever the teachable moment occurs.
• Be committed to doing whatever it takes to help a student, whether in class, in an office, on the telephone, or in e-mail.
• Provide contemporary experiential and theoretical knowledge engaging with students and bring a sense of fun and adventure to the hard work.
• Participate in continuing education activities to promote professional growth.
• Support evidence-based learning activities.

Professional Characteristics
As a profession, nursing places great reliance upon individual responsibility and accountability. Therefore, students are held responsible and accountable for their professional behavior.

Personal Characteristics
Students are expected to exhibit personal and emotional characteristics consistent with the professional nurse role. Students who do not manifest these characteristics may be referred to the Dean of Nursing or designee and advised or required to seek appropriate assistance. Students who refuse to obtain assistance and/or persist in exhibiting inappropriate behaviors will not be permitted to continue in the nursing program. Students whose behavior indicates issues related to professional ethics and a sound moral foundation place themselves at risk for course failure or dismissal from the program. No photography should be performed within the classroom, lab, or clinical settings as it may violate other’s rights who may be included in the photograph. Photography outside of the classroom/lab/clinical setting is allowed with the exception that no one is included in the photography who has not given permission and that no unprofessional or rude conduct is being displayed. Any cell phone device within the classroom, lab, or clinical setting will ONLY be used for educational purposes to perform research related to patients or assignments at appropriate times.

Students may also be dismissed from the program for exhibiting improper behavior or professional misconduct. Such behaviors include but are not limited to: rude or inappropriate behavior, fighting on campus or institutional grounds, plagiarism, breaching patient/student confidentiality, compromising the safety of a patient, or unsafe nursing care. The Brookline College Student Code of Conduct policy may be found in the College Catalog. Instances of such behavior may be documented and the student referred to the Dean. While Brookline College supports the faculty-student mentoring model, it is not permitted to

Revised Fall 2017
engage outside of the learning environment within social media or non-school approved social events while each party is engaged in an academic relationship.

**Academic Integrity (Dishonesty), Plagiarism, and Copyright Infringement**

Brookline College requires all students, faculty, and staff to conduct themselves and produce academic work in an ethical manner. Students are expected to conduct themselves always with the highest academic standards.

Plagiarism is typically defined as the use of another person’s or a group’s words or ideas without clearly acknowledging the source of that information, resulting in the false representation as one’s own work. It is understood that plagiarism can be intentional and unintentional; therefore, the following descriptors provide the student with an understanding of how to avoid plagiarism. Plagiarism is also defined in other ways including the use of one’s own previous written work without citing and/or resubmitting it for another course. In addition, plagiarism can occur when another’s words are used without quotation marks and/or citation provided. More specifically, to avoid plagiarizing, a student or other writer must give credit when he/she uses:

- Another person's idea, opinion, or theory
- Any facts, statistics, graphs, drawing - any piece of information that are not common knowledge
- Quotations of another person's actual spoken or written words
- Paraphrases of another person's spoken or written words
- Another person's data, solutions, or calculations without permission and/or recognition of the source, including the act of accessing another person's computerized files without authorization
- One’s own written ideas from the past or from another class without providing proper citation. It is never acceptable to turn in a previous paper in its entirety or with changes as if it were a new paper. This is considered academic self-plagiarism.

Plagiarism may be either deliberate or unwitting. Regardless; it is the responsibility of a college student to know what constitutes plagiarism, so they may avoid it. Ignorance is not a legitimate defense against a charge of plagiarism. Cheating, falsifying work, or plagiarism will not be tolerated. The penalties for these offenses are as follows, but may not be linear in the event of an egregious act, requiring acceleration of the penalty process:

- First offense: Student receives a "0" on the assignment or test
- Second offense: Student receives an "F" for the course.
- Third offense: Student receives an "F" for the course and may be expelled from the college.

Copyright – Students, faculty, and staff must also be cognizant of and avoid copyright infringement. Copyright infringement is using someone else’s ideas or material, which may include a song, a video, a movie clip, a piece of visual art, a photograph, and other creative works, without authorization or compensation, if compensation is appropriate. The use of copyright material without permission is against federal law, and penalties may include fines and/or imprisonment.

As a consequence of expanded availability of digitized files and computing, peer-to-peer file sharing has become common place. However, making a copyrighted material available to others through the use of file sharing networks (e.g., Shareaza, Kazaa, BitTorrent, eMule, or the like) is also prohibited by Brookline College and is considered copyright infringement. In addition to the aforementioned potential for federal penalties, Brookline College reserves the right to revoke the Information Technology
privileges of those using or contributing to the use of file sharing networks to either access or provide use of or access to copyright material.

ACADEMIC POLICIES

Policy Statement

1. Brookline College reserves the right to modify policies, course schedules, curricula or courses within reason due to exigent circumstances, program upgrades, and/or content changes.
2. Student interruptions in program schedules may result in a delay of graduation.
3. Brookline College credits are not automatically transferable to other schools (see College Catalog)
4. All programs may not be available at all locations (see Brookline College Catalog Supplement – Tuition and Fees).
5. Brookline College reserves the right to cancel programs of study, modes of delivery, or individual courses as it deems necessary.

Students are responsible for reviewing and understanding academic policies as outlined in the Brookline College Catalog and the Nursing Student Handbook.

Teaching/Learning

The program will be delivered using a variety of instructional formats. On-campus instructional methods include: a variety of student-centered learning activities and/or classroom models, lectures, slide presentations, simulation scenarios, demonstration and return demonstration, role playing, interactive online instruction, and other critical thinking activities. Students will participate in individual and cooperative learning activities in the classroom, clinical lab environments, and online discussions. Computer labs, laptop carts, electronic devices, smart classrooms, virtual learning environments, simulation manikins, DVDs, and other multimedia equipment provide the technological support for various teaching methodologies. Online instructional methods may include one or more of the following: threaded discussion, case studies, skills demonstration, computer/technology exercises, problem solving, group activities and analytical projects.

Course Syllabi

Course syllabi are documents that guide students and provide structure for courses. Course faculty reserve the right to alter the course syllabus at any point and will provide information to students about changes made.

Attendance

Nursing education prepares students to develop professional and clinical competence and to assume professional accountability. Nursing practice is licensed and nurses must adhere to the professional standards established by the American Nurses Association and other professional organizations. Therefore, attendance and professional behavior is expected in all classroom, laboratory, and clinical settings. Attendance and prompt arrival correspond to professionalism and professional accountability. Students are expected to attend every class and clinical experience and to arrive on time. Attendance is essential for student learning and for the maintenance of Federal Financial Aid. Students are expected to be present and prepared prior to all classroom, laboratory, or clinical settings. Students are expected to attend the entire scheduled sessions. Students must be respectful of peers and faculty in these settings.

Revised Fall 2017
On-campus Attendance
Attendance will be taken by the course instructor in all courses. Students who fraudulently sign for another student are considered to be demonstrating a lack of academic honesty and integrity. All parties involved in these actions will be subject to sanctions up to and including dismissal from the program.

At the start of each course the student will receive a course syllabus in which attendance requirements are included. Attendance will be taken in every class and records maintained to comply with institutional requirements.

As a demonstration of professionalism, students are expected to be on time for every class. Students are expected to return on time from scheduled class breaks and to remain in class as scheduled for the entirety of the class. When a student arrives late for class, returns from a scheduled break late, or leaves early, it is counted as missed time. Any missed time is recorded in 15 minute increments to determine the total time missed. Students who are absent 10% or more of the total hours for any course (Non-NUR Courses are 15%) will receive a written warning via the Student Nurse Action Plan (SNAP) Form located in the Appendix 1.

Students who are absent 15% or more of the total hours (Non-NUR courses are 25%) for any course will receive a failing grade for the course. A letter of failure will be issued by the Dean and a fail grade will be posted. The faculty and administration acknowledge that there are mitigating circumstances that may prevent a student from attending the scheduled times over and beyond the permitted percentage. In these cases, there will be make-up for the missed percentage of classroom time. Mitigating circumstances are defined as court ordered appearances, jury duty, bereavement, military duty (not exceeding three days/course), or another serious condition that prevents attendance, is documented, and approved by the Dean. All exceptions require authorized documentation.

Students must be available for each week of the 15-week semester and cannot make plans to be away prior to the official end of classes. Each course syllabus contains a class schedule for the semester that includes all required activities, including exams.

Online Attendance
Online students are encouraged to participate often in each course they are enrolled. Minimally, a student must submit a gradable item each week in order to be marked present for that week. A gradable item is defined as a threaded discussion, assignment, test or quiz. A student who does not complete at least 50% of the scheduled weeks will not receive credit for the course.

After two consecutive weeks (Monday - Sunday) of absence in all classes a student will be withdrawn from the College. If a student is enrolled in multiple courses, attends in one course but fails to attend the others, they will be withdrawn from the courses for which excessive absences are noted (i.e., after two consecutive weeks) in accord with the College’s procedures for course withdrawal. This policy applies to all continuing students and initiates at the point at which they attend during each term. This policy applies to new students at the point at which they have posted attendance in both Week 1 (i.e., the add/drop period) and Week 2. Any action taken due to excessive absences may affect financial aid and graduation dates. A student who does not complete at least 50% of the scheduled weeks will not receive credit for the course.

Revised Fall 2017
Clinical Attendance

Objectives cannot be met if there is missed clinical time (on-site clinical and simulation). Students are not to miss clinical time unless there is a mitigating circumstance (Mitigating circumstances are defined as court ordered appearances, jury duty, bereavement, military duty (not exceeding three days/course), or another serious condition that prevents attendance, is documented, and approved by the Dean.) The total number of hours required for the clinical component of a course **MUST be** completed, any missed time **MUST be** made up. To further clarify, any missed clinical time must be made up on the date and time as specified by your clinical coordinator and instructor. This specific date will be announced at the beginning of each semester. It is the responsibility of the student to be knowledgeable about this date and not to plan any events, which would prevent attendance on this date should an absence occur. NO partial make-up days will be allowed. Any student requiring attending the clinical make-up day (even if only 30 minutes was missed) will be expected to attend the entire make-up day.

Attendance and punctuality at all clinical experiences are required. Any student who arrives late to clinical, including simulation, will be documented as tardy (in 15 minute increments). Any student who is 30 minutes or later to clinical or simulation will be sent home and this will count as a non-mitigating absence. Any tardiness will count toward the total of clinical time missed and may cause a student to miss more than one clinical day, resulting in failure. All tardies will be documented using the SNAP form. Any student with more than 29 minutes of missed clinical time due to tardies will be required to attend the clinical make-up day session. Students who are absent more than one clinical day (as defined by the number of hours for that clinical experience) during the semester will receive a failing grade for the course with the exception of mitigating circumstances (Mitigating circumstances are defined as court ordered appearances, jury duty, bereavement, military duty (not exceeding three days/course), or another serious condition that prevents attendance, is documented, and approved by the Dean.). All exceptions require authorized documentation. No pre-planned clinical absences are permitted. The administration and faculty highly encourage students not to miss a clinical day unless there is a serious issue that prevents attendance. Should a student need to miss a clinical day, documentation is necessary. Upon missing a clinical day, a SNAP form will be issued to provide proper documentation of this absence and to serve as a notification to the student that any further absences in clinical may result in failure of the clinical course, even if that second absence is a mitigating circumstance.

NO clinical absences are permitted in the specialty areas (Psychiatric, Obstetrical, or Pediatric). Should a student be absent from a specialty clinical area, this will constitute failure of the clinical with the exception of mitigating circumstances (Mitigating circumstances are defined as court ordered appearances, jury duty, bereavement, military duty (not exceeding three days/course), or another serious condition that prevents attendance, is documented, and approved by the Dean.). Should a student miss in a non-specialty clinical area and also miss in a specialty area (without mitigating circumstances), the student will fail the clinical where the non-mitigating circumstance occurred. Only one clinical make-up day is allowed per semester and it must be made-up on the scheduled make-up day, unless mitigating circumstances occur that result in two clinical days missed from two different areas (specialty and non-specialty) and these two must also be made-up on the scheduled make-up days. Mitigating circumstances are defined as court ordered appearances, jury duty, bereavement, military duty (not exceeding three days/course), or another serious condition that prevents attendance, is documented, and approved by the Dean.

Revised Fall 2017
Mitigating circumstances need to be approved by the Dean and as stated in this handbook. Such issues as child care, traffic, flat tire, transportation issues (unless documented by a police report), oversleeping, Doctor’s appointments, and other non-emergency issues are NOT considered mitigating circumstances.

Leaving clinical early is NEVER acceptable unless mitigating circumstances arise and it is approved by the clinical instructor, the lead course instructor and/or the Dean of Nursing prior to leaving the clinical setting.

Should a student become ill during a clinical session, he/she must go to the facility emergency department for assessment. The student may refuse treatment at the point of care but documentation must be received that the student is medically cleared. Should a student need to leave the clinical setting due to illness, it is the responsibility of the student to provide transportation (ie. A friend or relative who can pick them up). No students will be dismissed from clinical to provide transportation for another student.

**Satisfactory Academic Progress (SAP) Statement**
Satisfactory academic progress (SAP) is necessary in order to maintain eligibility for financial aid programs and to become a Brookline College graduate. Please refer to the Brookline College Catalog for a comprehensive description of the Satisfactory Academic Progress (SAP) policy.

**Student Assistance/Student Success: PASS Program**
Students are often challenged by the demands that define full-time academic programs. Given the nature and intensity of the proposed program, the College has specific resources designed to assist students to successfully progress through coursework. The Nursing Department has implemented a program called *Promoting Achievement and Student Success* (PASS). The enrollment of students into the PASS program can begin as early as the first semester and may continue until graduation.

The PASS program is a support service offered by the Nursing Department which focuses on academic counseling and includes assessments such as identification of educational difficulties, difficulty with coursework or study habits, poor organizational skills, excessive absenteeism or chronic tardiness, issues with test taking skills as well as identification of external stressors that yield ineffective coping skills. Once barriers to learning are identified, the PASS program facilitates implementation of an individualized learning plan developed collaboratively with the student to promote success. The College has additional resources that may be available to students. The Brookline College Catalog contains additional information related to student services.

**Student Nurse Action Plan**
Student Nurse Action Plans (SNAP) serve many different purposes. They are utilized to provide notice to the student of actions that have occurred and potential consequences should those actions repeat themselves. In some cases, the SNAP form provides a verbal or written warning for a student to discontinue certain actions or behaviors that are non-compliant with the policies and/or practices of Brookline College, the Nursing Code of Ethics, and the State Nurse Practice Act. In these circumstances, the verbal and/or written warnings must be considered when three occurrences have taken place that display a pattern of behavior that is inconsistent with what is acceptable at Brookline College. In these cases, the student will be required to have a meeting with the Dean and other staff or faculty member. At this meeting, the student may receive
disciplinary action up to and including possible probation, suspension, or dismissal from the course or program, which is consistent with the disciplinary action process of Brookline College.

Albuquerque Inclement Weather Policy
In Albuquerque school closures will be announced on KOB, channel 4. Clinical absences due to weather conditions when the college has not officially closed must be made up, consistent with the policy on clinical absence. Students are responsible for determining if classes have been cancelled due to inclement weather and for checking with the instructor if there is a question about class cancellation.

Anyone can go to http://www.kob.com/alerts/index.shtml and setup to receive email or text message alerts about closures.

STUDENTS RIGHTS AND RESPONSIBILITIES
The student role encompasses certain rights and attendant responsibilities, as follows:

1. Students have the right to receive information on the course syllabus related to course objectives, expectations of students, grading criteria for the course, and guidelines for assignments.
2. Students have the right to practice clinical skills and receive feedback and suggestions for improvement prior to evaluation.
3. Students have the right to receive feedback related to class and clinical experiences, as well as guidance and suggestions to enhance learning.
4. Students must demonstrate professional behavior, responsibility, and accountability. These include but are not limited to:
   a. Ensuring all pre-clinical requirements have been met prior to beginning clinical experiences and ensuring these remain current during the program.
   b. Ensuring all financial requirements related to continued enrollments are met.
   c. Attendance at all class and clinical experiences.
   d. Punctuality for all class and clinical experiences.
   e. Prompt and proper notification if the student anticipates being late or absent.
   f. Appropriate preparation for class activities.
   g. Honest and open communication with faculty, staff, and peers.
   h. Submission of assignments by the due date.
   i. Demonstration of courtesy and respect in all interactions.
   j. Maintenance of clients’ rights to dignity, privacy, and confidentiality.
   k. Wearing appropriate attire to class and clinical experiences.
   l. Consistent use of culturally sensitive, as well as educationally and developmentally appropriate language in all interactions.
5. Students have the responsibility to participate actively in the learning process by asking questions in class, seeking out new learning experiences, and integrating theory into clinical practice.

CPR Certification
Students must maintain current CPR certification which includes “one person and two persons” rescue and care of adults, children, infants, and choking resuscitation. Students are required to carry and have a copy in their student file an American Heart Association (AHA) Healthcare provider card. CPR certification by any other provider will not be accepted. Students will be required to have the proper CPR certification prior to the start of clinical rotation. Students will NOT be permitted to attend clinical
without current CPR. If a student’s CPR card expires, the student will be required to obtain the AHA Health provider card. It is the student’s responsibility to renew and pay for CPR certifications and to ensure that CPR certification is current.

**Learning Resource Center**
Within the Learning Resource Center (LRC) students will find a general assortment of textbooks covering diverse areas and a current selection of nursing journals. The LRC’s electronic resources are available online and access is provided to students in all programs and tracks. Computer labs are also available for students in the main campus area. All areas are quiet study areas; please be considerate of others. Please do not hesitate to ask for assistance; please notify LRC personnel of any problems with material or equipment. Several guidelines apply to the use of the LRC.
1. No food or drink is allowed.
2. No children are allowed; their presence is not conducive to studying.
3. Students must present an ID card to obtain or checkout any learning materials from the LRC.
4. Removal of multimedia audiovisual materials from the LRC without permission will lead to disciplinary action which may result in dismissal from the program.

**Nursing Laboratory**
Clinical nursing courses provide a venue in which students may practice clinical skills. The Nursing Laboratory has materials designed to complement learning objectives and may be used for individual skills practice with approval from the Laboratory Manager. Students are expected to practice with each other in a respectful and professional manner. Students’ clinical professors are available for lab instruction and supervision. Students are to participate in clean-up and be responsible for the equipment and materials in terms of safety, maintenance, and care. Students may only use equipment related to skills that have been taught in the classroom and lab. Students are responsible for reporting any equipment in need of repair to a faculty member. Only Brookline College nursing students are allowed in the lab. Other than water, no eating or drinking is permitted in the lab.

**Smoking**
All Brookline College campuses are non-smoking. Students wishing to smoke may do so in the designated outdoor areas. When in the clinical site, students must adhere to the smoking policy of the clinical agency.

**Drug-free Environment**
Medical Marijuana: Arizona Revised Statute §15-108 states a person, including a cardholder, may not lawfully possess or use marijuana on the campus of any public university, college, community college or postsecondary institution. New Mexico Compassionate Care Act § 30-31C-1 states the distribution of medical cannabis to qualified patients or caregivers may not take place within three hundred feet of any school, and participation by a qualified patient or caregiver does not relieve the person from criminal prosecution or civil penalty for possession or use of cannabis on school property. Growing and using marijuana remains a crime under federal law, and federal legislation also prohibits any institution of higher education that receives federal funding from allowing the possession and use of marijuana.

It is understood that a student may require a prescription for narcotics or scheduled drugs that have the potential to impair behavior (i.e. opioids, Benzodiazepines, CNS depressants, and some OTC drugs that impair judgment but have no prescription). It is not acceptable to be in the clinical setting while on these

Revised Fall 2017
drugs, even when prescribed. The Nurse Practice Act supports that every clinician is safe and without impairment in their judgment while providing care. Using prescription drugs that impair judgment during the clinical setting will result in ‘for cause’ drug testing and removal from the clinical setting. Patient safety is always the priority.

**Drug Screening “For Cause” Testing**

This policy refers to the use/misuse of or being under the influence of: alcoholic beverages, illegal drugs or drugs which impair judgment while on duty in any healthcare facility, school, institution or other work location as a representative of Brookline College.

1. When an instructor perceives the odor of alcohol or observes behaviors such as, but not limited to, slurred speech, unsteady gait, or confusion, and these behaviors cause the faculty or clinical instructor to suspect the student may be impaired by alcohol or drugs, the following steps will be taken:
   a. The instructor will remove the student from the classroom, lab, patient care, or other assigned work area.
   b. Upon the student’s oral consent, the instructor will arrange for transportation to take the student to a designated medical service facility for drug testing. The cost will be paid by Brookline College. The Dean of Nursing will be immediately notified of the situation.
   c. The student is to have a picture ID in his/her possession.
   d. After testing, the student should call the transportation service for transport home; the cost will be paid by the College.
   e. Students who admit to alcohol or drug use still require drug testing.
   f. The student will pay all costs associated with the for-cause drug testing.

2. If the results of the test(s) are negative for drugs, alcohol, non-prescribed legal substances, or illegal substances the student will meet with the Dean of Nursing within 24 hours of the test results to discuss the circumstances surrounding the impaired clinical behavior. It is acknowledged that there are cases where a student has prescriptions for narcotics or scheduled drugs that have the potential to impair behavior (i.e. opioids, Benzodiazepines, CNS depressants, and some OTC drugs that impair judgment). It is not acceptable to be in the clinical setting while on these drugs, even when prescribed. The Nurse Practice Act supports that every clinician is safe and without impairment in their judgment while providing care. Using prescription drugs that impair judgment during the clinical setting will result in ‘for cause’ drug testing and removal from the clinical setting. Patient safety is always the priority.
   a. If the indicator was the odor of alcohol or marijuana, the student will be mandated to discontinue the use of whatever substance may have caused the odor before being allowed to return to academic activities.
   b. If the indicator was behavioral, consideration must be given to a possible medical condition being responsible for the symptoms and a medical evaluation may be required before returning.
   c. If the result was negative but there is any indication, such as an MRO warning of prescriptive drug levels that puts patient safety at risk, the student will not be allowed to enter the clinical setting until patient safety is no longer considered a risk. It is important to note that using prescription drugs that have the potential to impair judgment, while in the clinical setting, is not acceptable and will result in disciplinary action.
d. Based on the information provided and further medical evaluation, if warranted, the Dean of Nursing will make a decision regarding return to academic activities.

3. If the results of the test(s) are positive for alcohol, non-prescribed legal substances, or other illegal substances the Dean of Nursing will withdraw the student from all nursing courses for a period of one year.

4. The results of the positive drug test will be reported to the State Board of Nursing.

5. If a student refuses “for cause” testing
   a. The instructor will remove the student from the clinical setting pending a full investigation. The Dean of Nursing will be immediately notified of the situation.
   b. The instructor will arrange for transportation to take the student home. If the student refuses transportation, the student should be informed that security/law enforcement will be notified.
   c. Failure to comply with any aspect of this policy will result in dismissal from the program.

Readmission Guidelines Related to Substance Abuse
1. Students withdrawn for reasons related to substance abuse will
   a. Submit a letter requesting readmission with one of the following:
      1) Documentation from a therapist specializing in addictions indicating the status of abuse, addiction, or recovery and/or documented rehabilitation related to the alcohol/drug illness.
      2) Documentation of compliance with a treatment program including a statement that the student will be able to function effectively and provide safe and therapeutic care for patients.
   b. Undergo drug screen for alcohol/drugs immediately prior to readmission.

2. If a student, after being re-admitted to the nursing program, has positive results on an alcohol/drug test the student will be permanently dismissed from the program.

Drug Screening
Students may be required to submit to drug testing prior to clinical experiences if required by the specific clinical agency. If required, testing costs will be covered by Brookline College.

Student Dress Code
The Brookline College nursing identification badge is to be worn when the student is participating in classroom, laboratory, and clinical experiences. The identification name badge and/or insignia should only be worn during clinical experiences, classes, and activities sponsored by the Nursing Department. Wearing of the uniform, identification name badge and/or insignia should never be worn in a setting that requires a 21+ age mandate (i.e. Bars, Restaurants) nor be displayed on social media in such settings or in an unprofessional or indecent manner.

Dress code for classroom is business casual and includes those items as indicated in the clinical/lab dress code policy below. Business casual is defined as that dress which presents a professional and businesslike impression. Business casual dress does not include such attire as that which would be worn doing yard work, going to a club, or exercising. Clothing should not be wrinkled, torn, frayed, or stained. Students will avoid clothing that excessively exposes the back, chest, stomach, upper thighs, or buttocks.

Revised Fall 2017
Clothing will be clean and display no offensive language or pictures. Jeans with rips, tears, or holes are unacceptable attire on campus.

**Dress Code: Traditional BSN and BSN/BDG Clinical/Lab Setting**

Students will be issued uniforms by Brookline College, two sets of scrubs. If students would like additional uniforms or a garment requires replacement while in the program, the cost is the responsibility of the student. **Approved uniforms must be worn during all clinical and laboratory experiences.** The following is the dress code for students while in uniform and during all laboratory and clinical experiences:

1. **All students are required to wear the approved Brookline College Nursing Department student uniform.**
2. **Brookline College identification must be worn on the uniform at all times, clipped or pinned at lapel level.**
3. Uniforms are to be neat and clean.
   a. **Shoes must be white or black, non-porous, closed-toed and closed-heeled; nursing shoes or sneakers.**
   b. Socks or nylons must be worn with uniforms and must be of a color consistent with the uniform (i.e. black or white).
   c. Students may wear a black, plain long sleeve t-shirt under the uniform top.
   d. Students may wear a plain black buttoned or zippered sweater. Hoodies may not be worn in the lab or clinical area.
   e. **Pants may not be longer than the top of the shoe.**
   f. No hats, caps, hoods, headbands, or bandanas of any kind may be worn in the classroom or clinical areas. Plain, thin, unadorned headbands are acceptable.
4. **Personal adornment**
   a. A wedding band and one other small ring is the only jewelry allowed while in uniform. No neck chains, pins, or bracelets are to be worn; small stud earrings may be worn with a limit of one per ear. Only neutral tone, solid earlobe gauges may be worn.
   b. All visible body piercing jewelry must be removed when in uniform.
   c. Tattoos should not be visible and must be covered if revealed by the uniform.
5. Students must have a watch with a second hand and must bring their electronic devices and equipment kit to all laboratory and clinical experiences.
6. **Personal hygiene**
   a. **Fingernails are to be clean, short and smooth. Nail polish is not permitted.**
   b. False/enhanced nails are not permitted and will result in the student being sent home if they cannot be removed.
   c. Hair must be of neutral tones, clean, styled neatly, worn off the collar and pulled back from the face. Long hair must be secured so it does not fall over the shoulder.
   d. Beards and mustaches must be neat and closely trimmed.
   e. Make-up is to be minimal; no dark lipstick or heavy make-up is permitted.
   f. **No offensive body odor, cigarette smells, or other heavy odors, such as cologne or perfume, are permitted. Students who have a discernible odor will be asked to change their uniforms. If they are unable to do so, they will be asked to leave the class or clinical area until the smell dissipates. The time missed will be counted as absent.**
   g. Students may not chew gum while in uniform.
7. If the regulation uniform cannot be worn during pregnancy, faculty should be consulted regarding acceptable dress. Students who require adaptations to the uniform for cultural and/or religious reasons should consult with Dean of Nursing prior to the first day of class.

*Dress code violations that may impact patient, staff and/or student safety are bolded.

A student, who is non-compliant with the dress code, will receive one warning in the form of a Student Nursing Action Plan. In addition, the student will be provided with appropriate school-owned attire, allowing the student to remain at school. The student will be responsible for returning the school-owned attire, cleaned and pressed within three days. **Any student found to have a dress code violation that may impact patient, staff and/or student safety is ineligible to remain in the clinical area and will receive an absence for the clinical day**. Violations that can be corrected immediately will not result in the student being sent home. Students who do not follow the dress code in the classroom will be asked to leave and time missed will be counted as tardiness or an absence.

**Student Participation in Outside Service Projects While in Uniform**

Brookline student nurses participate in health fairs, screening programs, and other public or private activities as authorized within the nursing program. During these activities students will identify themselves as students enrolled in the Brookline College nursing program, wear the school uniform, and conduct themselves in a professional manner according to the school policy.

**Course/Faculty/Program Evaluations**

Constructive student feedback is essential to improve the curriculum and instruction offered at Brookline College. Evaluations are taken seriously by the faculty and administration and are valuable in improving students’ learning opportunities, enhancing courses, and guiding faculty development. Each semester, students are given the opportunity to provide anonymous online feedback on program elements. At the end of each semester, students will provide their opinions about course content, course instructors, and clinical experiences.

**Communication Strategies**

A Communication Board is maintained outside the Nursing Department where relevant information and notices are posted. Students are responsible for checking the boards whenever they are on campus to be aware of information pertinent to the nursing program. Online announcements are provided to students who are enrolled in online courses to provide relevant information and notices. Information may also be provided through e-mail, certified letters, handouts, and class communication. The Nursing Department website is another important source of information.

**Online Student Identity Authentication and Privacy**

The Brookline College Learning Management System (LMS) for online students is a restricted access and password protected electronic environment. Prior to entering the LMS, an online student’s identity must be verified by way of an assigned unique login and password that is provided to each student upon enrollment and class registration. Verification of student information is provided at no extra cost to the student. Student identity will be maintained in a private format by the College in accord with established institutional privacy and confidentiality policies with access provided only to agents of the College who

Revised Fall 2017
require immediate and necessary use of the information in order to fulfill the various academic activities of the College. It is the student’s responsibility to strictly preserve the privacy of their login and password information. Students are prohibited from sharing login and password information. Any such intentional comprise of the integrity of the privacy of a student’s login and/or password (i.e., sharing of this information) will result in the student being subject to immediate termination from Brookline College. In the event a student believes the privacy associated with their login and password information has been comprised, they are required to contact school officials for an immediate reset of their information. This is also done at no extra cost to the student.

**Computer Requirements**
All electronic communications will be transmitted to students via the Brookline College student issued e-mail account. **Students are expected to have access to a computer and are expected to access their email accounts on a daily basis** during the week for up-to-date communications.

**Online Computer Requirements**
Students must have regular daily access to a computer that has the following (minimum requirements):
- A functioning e-mail account.
- A monitor capable of displaying 1024 x 768 at 16-bit color.
- Intel Pentium 4 Processor.
- 1 GB of RAM (More depending on Operating System requirements and recommendations).
- Access to hi-speed Internet service at a minimum speed of 256 Kbps (DSL).
- While dial-up may work, it is not suitable for many applications.
- Sound card and speakers.
- Supported web browsers: Internet Explorer (version 7.0 or above) or Mozilla Firefox (version 3.0 or above).
- Adobe Reader and Flash Player (version 9.0 or above), Adobe Shockwave Player, Java, JavaScript, Windows Media Player, and QuickTime.

**Resolution of Student Concerns**
A grievance is a claim by a student that there has been a violation, a misinterpretation or an inequitable application of an existing policy, rule or regulation of the College. An appeal and/or a formal grievance are two ways that students can request a formal change to an official decision of the Institution. Whenever possible the submission of an appeal or grievance will be dealt with confidentially. In addition, all investigations will be undertaken impartially with no reprisals of any kind being undertaken by any member of the School for the submission of an appeal or grievance. Appeal and/or grievance proceedings will be treated in accord with the College’s FERPA policy which can be found on page 19 of this catalog.

The steps involved with resolving a student concern are: An informal appeal, a formal appeal, and formal grievance. It is a requirement of the College that a student exhaust the appeal process in its entirety prior to submitting a grievance to allow for an appropriate resolution to be reached. Further, if an appeal or grievance is not submitted within ten (10) business days the initial decision of the school will stand.
**Appeal Process for All Students**

**Step 1: Informal Appeal**
The Informal Appeal process allows students to identify a concern and have it addressed expeditiously without the need for the issue to go to the Appeal Committee.

1. Students will meet with the instructor, if appropriate
2. If there is no resolution, the student may file an Informal Appeal
3. For an Informal Appeal, the student must complete and submit a student issues/concern form.
4. The student will meet with the Director of Education, Dean of Nursing, or other designee to discuss the Informal Appeal
5. If there is still no resolution, the student may file a Formal Appeal

**Step 2: Formal Appeal Procedure**
The Appeals Committee acts upon requests for exceptions to existing academic policies and requirements. The committee works to find equitable and reasonable solutions supported by evidence.

1. For a Formal Appeal, the student must complete and submit a student issues/concern form
2. The Appeals Committee, composed of faculty and Director of Education, Dean or other designee, will convene to review the student’s appeal
3. The Committee will evaluate the appeal based on the following
   a. The Committee will review the appeal and supportive documentation
   b. Review student academic performance
   c. Evaluate the impact of significant non-academic issues
   d. Interview the student, if she/he desires to present her/his case to the committee
   e. Review documentation provided by the student
4. If the student feels that due process was not followed by the Appeals Committee, she/he may request a review by following the formal grievance procedure

**Step 3: Formal Grievance Procedure**
Students may wish to formally file a complaint with the College. In instances where all other attempts at resolution have failed, a student’s concerns can be resolved through the use of the Grievance Procedure:

1. Within five (5) business days of the alleged action(s), the student must present in writing, all facts of the grievance as below:

Revised Fall 2017
2. A response to the grievance will be made within ten (10) business days of the receipt of the written complaint. A grievance committee, if formed, will be comprised of the appropriate number of individuals from the appropriate areas to ensure a fair and unbiased evaluation.

3. After the initial decision has been rendered, the student may request that the Chief Compliance Officer, review the process and outcomes of the grievance.

4. After a decision has been rendered by the Chief Compliance Officer, the student may request that the Chief Executive Officer review the process and outcomes of the grievance.

5. If the student continues to feel that due process has failed after exhausting the above procedures, the student may contact their local state board of education, program specific accreditor or the Board of Nursing.

Revised Fall 2017
2. For a student attending online and residing in Maryland, if a complaint cannot be resolved after exhausting the Institution’s grievance procedure, the student may file a complaint with the Maryland Higher Education Commission and the institution is subject to investigation of complaints by the Office of the Attorney General of Maryland Higher Education Commission. Students must contact the State Board for further details:

   Maryland Higher Education Commission
   6 North Liberty St., 10th Floor
   Baltimore, MD 21201
   (410) 767-3301; 1-800-974-0203 (toll free)
   www.mhec.state.md.us

3. For a student attending online and residing in Georgia, if a complaint cannot be resolved after exhausting the Institution’s grievance procedure, the student may file a complaint with the Nonpublic Postsecondary Education Commission (NPEC) and the institution is subject to investigation of complaints by the appropriate Standards Administrator (SA) at the NPEC. The NPEC Student Complaint Process can be found in detail at the following website address: http://gnpec.org/forms/pdf%20files/ComplaintProcess.pdf

   Students must contact the Commission for further details:
   Nonpublic Postsecondary Education Commission
   2082 East Exchange Place, Suite 220
   Tucker, Georgia 30084-5305
   (770) 414-3300
   www.gnpec.org

Any questions regarding this grievance procedure should be directed to Brookline College corporate office at 602-644-7000.

Professional Organizations
Professional associations set standards for the professional and work for the practitioner in a number of ways including advocacy, lobby activities, continuing education, information, consultation, publications, grants, loans, and scholarships and the opportunity for professional growth and recognition.

Students are encouraged to join, at student rates, the organizations that represent and support the profession. Membership allows the student to vote on matters of importance to the profession and to become acquainted with other student members from other schools as well as practicing nurses and enhances the student’s professional development.

Student Nurses Association
The Nursing Program encourages all students to become active members of the National Student Nurses Association (NSNA). Privileges of membership include: networking, access to informative programs and scholarships and opportunities to provide community services. This organization is made up of nursing students and goals include, but are not limited to, increasing student interaction, fund-raising for the organization, and for outside causes, increasing nursing knowledge and experiences, and increasing public relations within the school and in the community.
Nursing Student Ambassador Program
The student ambassadors are representatives from the Student Affairs Committee and serve as the voice of student governance for the Brookline College nursing student population. Ambassadors serve as liaisons between the nursing administration and faculty and the nursing student body (Appendix 2).

Department Governance
Students’ opinions and input are valued by the Nursing Department. Student input is solicited through and communication facilitated by:
1. Participation in nursing committees as deemed appropriate
2. Nursing student ambassador representatives
3. Comments through the anonymous student comment box
4. Postings on Nursing Communication Board and Online Announcements
5. Student participation in evaluation activities including surveys of courses, faculty, clinical agencies, and resources; graduate exit surveys; and the ad hoc formation of focus groups, as needed.

Awards
The Nursing Department will award graduates who have demonstrated significant achievement and excellence. Full time faculty will nominate award candidates who will be voted on by all members of the Nursing Department.

Nursing Excellence Award
The Nursing Department will present a Nursing Excellence Award to the graduating senior(s) to recognize excellence in nursing academics. The award will be made to the graduating senior(s) who, in the opinion of the faculty, has/have demonstrated excellence in academic achievement, as demonstrated by cumulative GPA in all nursing courses.

Clinical/Practicum Excellence Award
The Nursing Department will present a Clinical/Practicum Excellence Award to the graduating senior(s) to recognize excellence in clinical practice. The Award will be made to a graduating senior(s) who, in the opinion of the faculty, has/have demonstrated a high degree of expertise in critical thinking, assessment skills, and nursing interventions.

Service Excellence Award
The Nursing Department will present a Service Excellence Award to a graduating senior(s) in recognition of outstanding performance and commitment to pre-professional, community activities, and/or unique learning experiences which enhance the educational process. The award will be made to a graduating senior(s) who has/have attained at least a 3.0 or greater total GPA. Students eligible for the Award will be notified by the Dean of Nursing and asked to submit substantiating evidence of their involvement in professional, community, and/or other activities. Students may nomination a peer for this award or may self-nominate.
Nursing Leadership Award
The Nursing Department will present a Leadership Award to the graduating senior(s) who most clearly demonstrate(s) outstanding leadership ability. Such demonstration includes, but is not limited to, class, college, and community activities.

Perseverance Award
The Nursing Department will present a Perseverance Award to a graduating senior(s) who has demonstrated exceptional initiative and shown perseverance in overcoming one or more significant obstacles. The award recipient will have overcome adversity to prevail in achieving the goal of completing the nursing program.

Peer Recognition Award
Students will be asked to nominate a peer who exhibits excellence in scholarship, leadership, personality, and character.

Dean’s Honor List
Each semester the dean will honor those students whose grade point average places them in the top 5% of the class.

STUDENT SAFETY
Students are required to be physically and mentally able to provide safe patient care in clinical practice settings. Students are expected to participate fully in all activities required by the nursing program. This includes, but is not limited to, the following abilities:

- Possessing sufficient hearing, visual acuity, and depth perception to perform nursing functions
- Lifting, moving, and operating equipment used in the care of patients
- Walking and standing for prolonged periods of eight to ten hours or more
- Hearing abilities sufficient to physically monitor and assess patient needs
- Visual abilities sufficient for accurate observation and performance of nursing care
- Psychological stability sufficient to perform nursing functions effectively in stressful situations and to exercise critical thinking, reasoning, and judgment in patient care situations

Liability and Health Insurance
While students are participating in assigned clinical experiences, students are covered under Brookline College’s General Liability Policy. The policy does not cover students who are injured at the facility. Students are covered only in assigned clinical activities.

If a student is injured during a clinical experience, the student must immediately inform the clinical instructor and complete the appropriate agency incident report. Neither the clinical facility nor Brookline College is financially responsible for care provided to a student who becomes ill or injured during clinical experiences.

Students are expected to carry healthcare insurance. Students who do not have health insurance may obtain information about free or low cost health care from the Campus Student Services Representative. **Students who do not have health insurance may not be able to attend clinical experiences when the clinical site requires proof of insurance as entry into that clinical experience.**

Revised Fall 2017
Required Health Information
Due to the nature of required clinical experiences in a variety of the healthcare settings, the Nursing Department has specific health and immunization requirements for students. Students must complete a comprehensive health assessment and immunization form which must be completed by a physician or other qualified health care provider, i.e., Nurse Practitioner or Physician Assistant. The forms must be submitted to the Nursing Department at least two weeks prior to clinical experiences. Nursing students are required to have:

- Documentation of immunity to Measles, Mumps and Rubella
- Documentation of immunity to Varicella
- Annual documentation of Tuberculin testing (PPD) with results <3 months prior to the start of the program
- Submission of a chest x-ray and TB Questionnaire for students known to be PPD positive
- Documentation of Hepatitis B vaccination or proof of immunity; if the student wishes to decline Hepatitis B vaccination, the student must sign the Hepatitis B Declination Form
- Td or Tdap is recommended within the past 10 years
- Documentation of seasonal and H1N1 flu vaccination as required by clinical facilities

Latex Allergy/Sensitivity
Latex is used in a variety of medical products including, but not limited to, gloves, blood pressure, equipment, tourniquets, urinary catheters, and certain skin barriers such as Tegaderm. Allergic reactions range from mild to severe. Those individuals who have reactions to balloons, rubber bands, and foods such as nectarines, avocados, bananas, potatoes, tomatoes, kiwi fruit, papaya, or chestnuts are at risk.

Symptoms of a suspected localized reaction to latex include development of urticaria, erythema, scaling of skin, vesicles and/or pustules following contact with latex products. If this occurs the student must

- cease contact with the product and notify the faculty member.
- notify the physician or primary health care provider as antihistamines may be required.

Symptoms of a suspected systemic reaction include systemic urticaria, angioedema, rhinitis, wheezing, conjunctivitis, shock, bronchospasm, and anaphylaxis. In this case, the student should seek immediate emergency medical care at a hospital and/or call 911.

Students will need to identify themselves as allergic in any and all school/clinical activities. If latex gloves are chosen, use reduced protein, powder-free gloves to reduce exposure and reactions to latex chemical additives.

Exposure Guidelines
Brookline College’s Accidental Needle Stick Procedures establishes the policy and protocol for accidental needle sticks that occur at a Brookline College campus or at a clinical site. It is Brookline College’s policy that students, faculty, or staff who are involved in an accidental needle stick receive immediate medical attention and are offered counseling, evaluation, and treatment, as necessary. The protocol calls for immediate action in providing medical evaluation, treatment and follow-up to students, faculty and staff involved in an exposure incident. In accordance with OSHA regulations, these procedures must be strictly followed.

Revised Fall 2017
Injury/Accidents
If a student is injured during the clinical experience, it is his or her responsibility to inform the instructor immediately. Agreements with clinical facilities demand specific procedural steps that faculty and students are expected to follow. A copy of the Injury/Accident Report or written summary of the incident must be forwarded to the Dean of Nursing within three days of the incident.

Students involved in an accident or who are injured while on campus are responsible for reporting the circumstances immediately to a faculty member and/or Dean of Nursing. Failure to report an incident and to complete appropriate documentation may result in dismissal from the program.

BACHELOR OF SCIENCE IN NURSING (BSN) PROGRAM
The Nursing Department offers three tracks leading to a Bachelor of Science in Nursing (BSN) degree. The first track is a traditional BSN program and the second is an accelerated program designed specifically for students who have completed a bachelor’s degree in another field of study (Bachelor of Science in Nursing for Baccalaureate Degree Graduates: BSN/BDG). Upon completion of either of these BSN tracks, students are eligible to take the NCLEX-RN examination and are prepared for entry into professional nursing practice. The third track is designed for students who hold an Associate’s Degree in nursing (ADN) and wish to earn a Bachelor of Science in Nursing degree (Bachelor of Science Nursing for Registered Nurses; BSN/RN). Graduates of all three BSN tracks are prepared to practice in a variety of health care settings and to exercise sound clinical judgment to improve the health of individuals, families, and communities in complex and culturally diverse environments.

Curriculum: Traditional BSN track (students enrolled prior to January 1st, 2017, PHX campus and all ABQ campus)

Admissions Requirements
Please refer to The Brookline College Admissions Requirements policy for each of the Bachelor of Science in Nursing tracks found in the College Catalog.

Grading System
Bachelor of Science in Nursing Programs Grading System
The Bachelor’s-level nursing programs (BSN) use different grading systems for nursing courses and nursing support courses. Because of the critical nature of the work and employment standards, the BSN programs use the following grading system.

All final course grades will be rounded to the nearest whole number (from the tenth place only) on final course grades ONLY (i.e. 76.5 or higher is rounded to 77%. 76.4 or lower is rounded to 76%. 76.49% = 76%).

NO grades will be rounded during the course, ONLY the final course grade is rounded.

Revised Fall 2017
Grade | Percentage | Rating | Grade Point Value
--- | --- | --- | ---
P | None | Passing | 0.0
I | None | Incomplete | N/A
R | None | Repeated | N/A
CR | None | Test Out | N/A
W | None | Withdrawal | N/A
WF | None | Withdrawal/Failing | 0.0
TC | None | Transfer Credit | N/A

In the BSN programs, a grade of less than “C” in any program concentration or nursing support course is considered unsatisfactory, and the course must be repeated.

Please refer to the College Catalog for comprehensive information on Incomplete “I”, Repeat “R”, Credit “CR”, Withdrawal “W”, and Transfer Credit “TC” grades.

**Academic Progression**

Students must achieve a grade of C or better in all general education courses to progress through the program. Students who receive a grade below a C may repeat the course, consistent with the Brookline College and Nursing Department policies on course repetition.

In order to progress from semester to semester in the traditional BSN and BSN/BDG nursing tracks, students must complete and pass all coursework in all prior semesters (unless approved by the Dean of Nursing due to mitigating circumstances). A grade of less than “C” in any two or more nursing program concentration courses at any time in the curriculum will result in dismissal from the program.

In order to progress from semester to semester in the BSN/RN nursing track, students must complete and pass all coursework in all prior semesters (unless approved by the Dean of Nursing due to mitigating circumstances). A grade of less than “C” in any two or more nursing program concentration courses at any time in the curriculum will result in dismissal from the program.

In addition, students enrolled in a nursing program must meet all of the standards set forth in the College Catalog and Nursing Student Handbook.

**PRELICENSURE BSN POLICIES**

**Examinations/Assignments**

Examinations (Tests and Quizzes) will provide the most common means of evaluation of student academic progress. Nursing Department examinations are delivered in a timed, computerized format designed to prepare student for the NCLEX licensure examination. Course faculty determine appropriate assignments for all courses and identify corresponding grading weights for those assignments. Classroom
Exams are primarily multiple-choice and computer-based. Standardized examinations may be used at the discretion of the course instructor.

Examinations must be taken on the day scheduled. Should a student feel that he/she cannot take the exam for any reason, they must communicate with their instructor before sitting for the exam. No exams will be allowed for re-takes. Mitigating circumstances only apply before the exam has been taken. Makeup exams will be scheduled based on mitigating circumstances that have documentation. Any mitigating circumstance requires documentation to be provided within 24 hours to the instructor. All Makeups (Exams) must be completed within seven (7) days of the missed exam. Failure to make up the work within this time will result in a zero being applied. All make up exams will exist in a different format. When a student is late for an examination, he/she will be permitted to take the exam, but will not be given additional time. Any activity related to recording or sharing of content on written, practicum, or computer exams will be considered academic dishonesty.

Late assignments will not be tolerated unless there is complete documentation of mitigating circumstances up to three days. A deduction of 10% per day up to the three days will be allowed (with mitigating circumstances documented). However, after three days a zero will be assigned. Mitigating circumstances include, but are not limited to, bereavement, military duty, jury duty, court ordered appearance, or other documented circumstances beyond the student’s control, including acts of nature. Documentation must be provided on the date assignment is turned in to receive a grade. In-class presentations must be made up according to the syllabus policy.

**Student Conduct during Testing**

Students will:

1. refrain from talking
2. leave all personal belongings in a location identified by the instructor
3. place nothing on the desk except for pencils and pens; scratch paper and a calculator will be provided by the instructor if necessary
4. begin the test at the same time; students who arrive late to class will not be given extra time to complete the examination
5. maintain academic integrity; students suspected of dishonesty will be removed from class without completing the exam and will be reported to the Dean of Nursing

A complete list of guidelines is located in Appendix 4.

**Nursing Concepts Synthesis Course**

**NCLEX-RN Assessment**

Standardized NCLEX-RN assessments are used to determine whether each student has acquired the necessary skills and knowledge needed to successfully pass the NCLEX-RN examination. During the Nursing Concepts Synthesis Course, students will take a NCLEX-RN assessment. Students will have three opportunities to achieve a satisfactory score. Students who do not meet the satisfactory benchmark will be encouraged to earn the ATI Virtual Green Light before sitting for the NCLEX-RN Exam. Determination of the satisfactory scores for the assessment test is
based on the **ATI RN Comprehensive Predictor**: Students are to achieve a benchmark of 72% or greater.

**Student Support for NCLEX Success**
A complete Strategies for Success ATI program is integrated within the existing curriculum and ensures that no student is failed by ATI testing and progresses if the final didactic course grade is a 77% or better. All capstone students are to attend the ATI Live Review course during his/her final semester. At the end of the Capstone ATI Live Review, the student is entered into Virtual ATI while in Concepts Synthesis course. Upon successful completion of the Concepts Synthesis course the student graduates with his or her class and paperwork to test for the NCLEX-RN is submitted to the board of nursing. All students are encouraged to complete the Green Light program prior to sitting for the NCLEX exam. At no time are students stopped from taking the NCLEX exam if they have successfully met all graduation criteria, even if a 72% benchmark score was not achieved on the ATI Comprehensive Predictor after 3 attempts. Students also have access to other resources such as the PASS Coordinator whose role focuses on counseling students so they can be successful.

**Clinical and Laboratory Competence**
The nursing lab is used by faculty to explain, clarify, and demonstrate nursing procedures. It is used by students to practice these procedures in a supportive learning environment to further develop their skills and understanding of nursing care procedures. Assigned readings and learning activities are to be completed prior to lab/lecture so that the student is able to take full advantage of in-lab/lecture time to discuss and clarify assigned material and to practice and demonstrate skills.

Faculty evaluation of clinical skills competency will be conducted in all clinical courses. Students who fail a clinical skills evaluation will be provided an opportunity to remediate prior to retesting. Retesting will be conducted by clinical faculty members who were not part of the first skills evaluation. Students who fail the second attempt will receive a clinical failure and a failing grade for the course. *This policy does not apply to comprehensive health assessment in the NUR 302 Health Assessment course.*

Students are required to show continued competence in clinical skills throughout their program of study. Students may be required to participate in additional clinical skills assessment outside of regularly scheduled academic activities at the discretion of the faculty or administration. These assessments are intended to evaluate student competency on an ongoing basis and determine the need for additional practice. Skills learned during the current or previous semesters may be tested. Students who are unable to demonstrate competence will be required to complete remediation and retesting of the skill.

Students are required to demonstrate competency in designated nursing procedures as determined by faculty assessment. Students cannot perform designated skills in the clinical setting until the skills have been satisfactorily performed in the nursing lab.

Students are required to demonstrate competency in the clinical setting. For courses with a clinical component, students must pass the clinical component of the course as well as the lecture portion of the

Revised Fall 2017
course to receive a passing grade. Students who fail the clinical component will automatically receive an “F” for the entire course.

**Medication Calculation Competency**

Medication calculation exams will be required for all nursing students each semester. The purpose of medication calculation competency examinations given throughout the curriculum is to assess nursing students’ ability to calculate medication dosages and to apply the concepts that underlie dosage calculation.

Six medication calculation exams will be given in each of the following clinical courses: Fundamentals, Adult Health I and II, Nursing Concept Synthesis, Obstetrical Nursing, and Pediatric Nursing. Each of these courses has a clinical component. SAFETY for patients is a top priority. Therefore, each test will assess previously acquired knowledge and will be administered as a timed, level-appropriate exam. Students will be permitted to use a basic four-function, non-programming calculator, which will be provided. These tests will be timed, per the school’s testing policy. Fundamentals students will be given the entire course duration to complete their medication math competency as medication administration is not done in the clinical setting. All other students will be required to complete their medication math competency prior to attending clinical. If clinical begins before the students are able to complete their medication math competency, students will not be permitted to do medication administration until all testing is complete and a 100% competency is achieved.

**Passing the exam is required to pass the course.** No acceptable margin of error exists within nursing practice when doing dosage calculation for patient medication administration. Students are required to pass the medication calculation exam with a 100% competency. Students will have four (4) attempts to pass this exam with a score of 100%. A math calculation review will be provided during class prior to administration of the first exam. Students who do not achieve the 100% score on any of the exams (with the exception of the fourth exam) must meet with the course lead instructor and establish a remediation plan. The remediation plan may include the development of individualized learning objectives and completion of an online dose calculation learning module. No more than three days should pass prior to the exam re-take.

Students who fail to achieve the minimum required 100% score on or by the fourth attempt at the medication calculation exam will receive a failing grade for the course. The student may repeat the course; however, failing grades in two or more nursing courses will result in dismissal from the nursing program. Again, this policy exists as a standard of practice to ensure patient safety is a priority. While this policy may seem extreme, every nursing student is asked to do his or her own research into medication errors among nurses and nursing students. In 1999, *To Err Is Human* was published and began the search for how to stop medication errors from occurring. Continuing today are research studies still trying to solve this dilemma. One answer to this call is to ensure that all nursing students and nursing graduates are competent in their ability to calculate dosages correctly and demonstrate competency in medication administration procedures. The Dean and Faculty encourage every student to take personal accountability for safe practice at the bedside.

**Clinical Experiences/Student Assignments**

Students are assigned randomly to clinical groups and clinical sites. The Nursing Department reserves the right to assign students to sites that best facilitate learning opportunities. Every effort will be made to

Revised Fall 2017
assign students to sites that are geographically convenient and to facilitate requests based on child care, elder care, or other needs. Please be advised this may not always be possible based on availability of learning experiences and clinical agency affiliation contracts. Clinical hours vary and may include evenings, nights, weekends, and 10- or 12-hour shifts. Students may be required to drive up to 3 hours each way to the clinical site.

Clinical experiences are based on contractual agreements between Brookline College and each clinical facility. Students are required to adhere to all agency policies and procedures during the clinical rotation. Agency staff, patients, and family members have the right to refuse care provided by nursing students. Faculty reserve the right to change student assignments as deemed appropriate to provide optimal learning experiences.

Students must arrive at clinical setting on time, professionally attired according to the dress code, with appropriate equipment including the electronic device, a watch with second hand, the equipment kit, and Brookline College picture ID. Students are expected to provide an appropriate report on patient status to the instructor and/or designated agency personnel.

Students are expected to remain on their assigned unit in the clinical setting for the entire shift unless otherwise relocated by the instructor. Students who wish to leave the unit for a break or to accompany a patient to another area must obtain permission from the instructor to do so. Students will be assigned a meal break and will return at the time identified by the instructor. Students who return late will be subject to the policy on lateness.

Clinical experiences in selected courses may require field experiences and/or observations during which instructors are available, but may not be on site with the student(s).

Safe Practice

Patient and staff safety is of primary importance in the clinical setting. Students

• may not do any procedures or give any medications without prior approval of the clinical instructor; there are no exceptions
• may not care for patients unless the clinical instructor or a staff nurse is in attendance
• will be supervised and assessed on all procedures
• may not take verbal or telephone orders
• must be supervised for all medication administration procedures
• may not witness consents for procedures or other legal documentation
• may not carry medication or narcotic keys

A student may be excluded from the clinical area when his or her performance is deemed to be unsafe. Unsafe practice is any situation arising from a student’s contact with a patient that places the patient, student, staff, healthcare facility, and/or college at risk. Examples of unsafe practice include lack of preparation, breach of confidentiality, failure to report significant assessment findings or changes in patient status, leaving a patient unattended, undertaking tasks with insufficient supervision or permission, incorrect practice, or leaving the unit without permission. Under extreme circumstances, a student may be
asked to leave the clinical setting, may receive an immediate clinical failure, or may be dismissed from the program for egregiously unsafe behavior. Caring for patients without an adequate rest period after working at an outside employment (8 hours from time shift ends to beginning of clinical rotation) is not permitted.

The Code of Ethics for Nurses with Interpretive Statements communicates a standard of professional behavior expected throughout the nursing program. The Nursing Department reserves the right to dismiss a student for unprofessional, unethical, dishonest, or illegal conduct that is inconsistent with the Code of Ethics.

**Clinical Preparation**
Any student who is not prepared to safely fulfill his/her clinical assignment will not be allowed to participate in clinical experiences. The clinical instructor will determine if a student is unprepared. Failure to complete the clinical experience due to lack of preparation constitutes an absence.

**Clinical Evaluation**
Students will receive ongoing feedback related to clinical performance and will receive a final evaluation at the end of the clinical rotation. Students whose performance place them at risk for a clinical failure will meet with the clinical instructor, course lead, and clinical coordinator to summarize clinical deficiencies and identify strategies for improvement.

**Medication Administration**
Students may not administer medications or treatments unless designated to do so by the clinical instructor. The ability of students to administer medications in the clinical setting depends on successfully demonstrating competence in drug calculation and administration as required by the Nursing Department and per course requirements. Once assessed competent, under the supervision of the instructor the student may

- administer oral, rectal, topical, subcutaneous, intradermal, and intramuscular medications
- administer pre-mixed continuous intravenous solutions
- administer IV piggyback and IV push medications

**Medication Errors**
A medication error is defined as any situation in which one or more of the seven rights of medication administration are violated without intervention of faculty and/or staff. If an error occurs, the patient’s safety is of utmost importance. Students must report a medication error to the clinical instructor faculty as well as the unit nurse manager or charge nurse as soon as the error is recognized. Any behavior in the clinical area which exposes a patient to physical or emotional harm may cause a student to be dropped from the nursing program.

**Electronic Devices**
Each student will receive an electronic device loaded with reference software. It is expected students will bring the electronic device to all learning experiences and utilize these tools as supplemental resources. Inappropriate or unauthorized use of the electronic during class, laboratory, or clinical experiences may result in disciplinary action. The cost of replacing a lost or damaged electronic device is the responsibility of the student.
When students are in class or lab cellular telephones and all other personal electronic devices must be turned off or put on silent or vibration mode. Text messaging and emailing is not permitted during class; electronic entertainment devices must be turned off and headphones removed. Students will be asked to leave the learning environment if they do not adhere to the policy as it is disruptive to faculty, staff, and other students.

**Recording Lectures**
It is a courtesy for students to request permission of individual faculty before taping lectures. For test security reasons, students may not tape test review sessions. Use of foreign language or other dictionaries are not allowed at any time during test taking. Individual questions should be directed to the test proctor.

**Transportation**
The Nursing Department makes an effort to use clinical agencies that allow students to care for diverse clients in a variety of settings. Clinical agencies may not be located in the immediate geographical vicinity of Brookline College. In order to provide students with optimum clinical learning experiences, *clinical rotations may take place at sites that require as much as 3 hours driving time*. Transportation to all experiences is the responsibility of the student who is also responsible for all parking fees. If a student does not drive, he or she must arrange to carpool with students who have a car or use public transportation. *Clinical courses may be scheduled during the day, evenings, or on weekends depending on faculty and clinical agency availability.*

Students are expected to arrive at the clinical setting on time, dressed in the required uniform, with the required equipment as noted above. Students are also expected to be prepared to provide care to a diverse group of clients and to participate actively in clinical conferences. Students who are inadequately prepared or arrive late will be sent home and will be marked absent for the clinical experience.

**Working during the Program/Health Habits**
It is recommended that students in the pre-licensure BSN tracks not be employed as the rigors of an intensive program require the student’s complete attention. Research has demonstrated that students who work—even part-time—compromise their ability to be successful. Good mental and physical health habits are also encouraged to allow students to meet the stress of a demanding curriculum.

**MASTER OF SCIENCE IN NURSING (MSN) PROGRAM**
The Nursing Department offers two tracks leading to a Master of Science in Nursing (MSN) degree. The Master of Science in Nursing Education (MSN-Ed) track prepares graduates to assume the role of a nurse educator within academic or health care settings. The Master of Science in Nursing, Health Systems Administration (MSN-HSA) track prepares graduates to assume a variety of administrative and leadership roles within academic or health care settings. Core courses in both tracks provide the foundation for specialty practice roles in the areas of health systems and policy, organizational leadership, and research applications. Specialty courses provide learning related to specific track related concepts.

**Admissions Requirements**

Please refer to The Brookline College Admissions Requirements policy for each of the Master of Science in Nursing tracks found in the College Catalog.

**Program Special Requirements**

The Master of Science in Nursing policies require that students recommend a placement preceptor and agency that meet established practicum standards. Student recommendation related to the agency and preceptor will be reviewed and either approved or denied by the program Dean.

**Grading System**

The following grading scale applies to all courses in the Master of Science in Nursing degree program.

Revised Fall 2017
In the MSN programs, a grade of less than “C” in any course is considered unsatisfactory and the course must be repeated.

Please refer to the College Catalog for comprehensive information on Incomplete “I”, Repeat “R”, Credit “CR”, Withdrawal “W”, and Transfer Credit “TC” grades.

Academic Progression
In order to progress from semester to semester in the MSN program, students must complete and pass all coursework in all prior semesters (unless approved by the Dean of Nursing or Vice President of Nursing due to mitigating circumstances). A grade of less than “C” in any two or more courses in the curriculum will result in dismissal from the program.

In addition, students enrolled in a nursing program must meet all of the standards set forth in the College Catalog and Nursing Student Handbook.

Practicum Experience
The practicum experience provides student with the opportunity to transition from the academic setting to the practice setting, in their area of specialization, under the guidance of faculty and an approved preceptor. During the practicum experience students will concentrate on applying theory, principles and concepts from course work to analyze situations, problems and/or issues they encounter in the practicum setting. In addition, students will develop individualized or personal learning objectives they want to achieve during the practicum and develop and execute projects with their preceptor. Objectives developed by the student and approved by the instructor, supplement course objectives, but do not in any way replace them. At the conclusion of the practicum experience preceptors will complete an instrument assessing the student’s progress and students will complete an instrument assessing the agency and the preceptor. Final evaluation of student achievement is the sole responsibility of the course instructor.

Practicum Course Requirements
The practicum experience requires 90 practicum hours over 8 weeks that are committed to the achievement of course objectives, personal/individual learning objectives, execution of approved practicum projects and observing/analyzing agency based activities primarily under the direction of a preceptor.

Students are responsible for securing a practicum site and qualified preceptor. Students are provided with a Practicum Application Packet which includes practicum expectations, requirements and all of the required documents for the practicum experience.

Practicum Application Packet includes the following:
1. MS Practicum Guidelines and Expectations
2. Practicum Affiliation Agreement
3. Preceptor Nomination Form
4. Student RN Licensure Verification
5. Preceptor RN License Verification
Submission and approval of all documents and related practicum requirements must occur prior to the beginning of any practicum course. The Dean of Graduate Nursing Studies, or designee, is responsible for the review and approval of practicum documents. Students who fail to submit all required documents two weeks prior to the start of the practicum will not be enrolled in the course.

STUDENT NURSE ACTION PLAN

Student Name: ___________________________ Date of Occurrence: ___________________________

Nature of Occurrence: Action Taken:

Previous SNAP forms? (# / Reason) ________________________________

Summary of violation / occurrence (attach any additional documentation):

Revised Fall 2017
The student listed above is in jeopardy of academic failure for the following reasons: *(Mark an “X” for all that apply.)*

- Poor Attendance (Tardies/Absence)  
- Low quiz grades/Low Test Grades  
- Unprofessional Behavior (Dress/Conduct)  
- Does not apply his/her self in class  
- Does not utilize extra assistance  
- Other  

- Does not turn in homework  
- Submits incomplete assignments  
- Needs to improve note-taking skills  
- Needs to improve study skills  
- Clinical Performance Below Expectations  

**Summary of corrective plan of action (attach any additional documentation):**

- Instructor Tutoring  
- Remediation  
- Peer Tutoring  
- Other  

Improvement is expected immediately. Adherence to school policies is a vital aspect of your education since adherence to policy in the work place is essential. Continued violations of student conduct policies will result in continued implementation of the disciplinary action process up to including course failure or dismissal from the nursing program. Please remember that we will help you in any way possible to correct this situation. If you have any further questions, please feel free to contact the Dean of Nursing.

---

**Student Signature** (*Student notice does not require student signature.*)  
**Date**

Your signature is intended to acknowledge receipt of the notice; it does not imply agreement or disagreement with the notice itself. If you refuse to sign, someone in a supervisory position within the agency will be asked to initial the form indicating that you received a copy of the form.

**Brookline College Nursing Student Ambassador Program**

**Purpose**

The Ambassadors are representatives from the Student Affairs Committee and will serve as the voice of Student Governance for the Brookline College Nursing Student population.

**Duties**

Ambassadors will serve as liaisons between the nursing administration and faculty and the nursing student body. These students will communicate general college and nursing program announcements from the administration and will bring student issues and concerns and proposed resolutions to the

**Revised Fall 2017**
Student Affairs Committee. The ambassadors will also meet with the Dean and/or other designated faculty each semester to discuss general student concerns, maintaining FERPA at all times, and will assist in the resolution of student issues. The Ambassadors will also be invited to faculty meetings, including the student affairs committee, at the Dean’s discretion, to be a representation of the nursing student body.

Election

Interested students in each semester will complete an application, which must have both the peer and faculty recommendation portions completed, as well as the statement of interest by the student. There will be 3-4 representatives for semesters BSN 1-4 and BSN 5-8/BDG 1-4, for a total of 6-8 Ambassadors. Once a student has been appointed as a Nursing Student Ambassador, he or she may remain as an Ambassador providing the student wishes to do so, and continues to meet the requirements.

Requirements

- No professionalism SNAP forms have been administered
- No disciplinary actions against the student
- 90% or greater attendance in all classes and clinical
- 3.0 GPA or greater

Brookline College Nursing Department Examination Guidelines

Personal Items
- All personal items must be placed in designated storage areas as instructed.
- Brookline College is not responsible for lost, stolen, damaged or misplaced items.

The following personal items may not be accessed at all during your examination appointment (including breaks):
- Any educational, test preparation or study materials
- Cell phones, tablets, cameras, pagers, jump drives or other electronic devices
- Cell phones are not allowed to be used as calculators
- Bags/purses/wallets/watches
- Coats/hats/scarves/gloves
- Food or drink, gum/candy
- Lip balm

Confidentiality
- You may not reconstruct and/or share exam items with anyone who has not taken the test with the intent of facilitating someone else’s success in the test.
- You may not disclose or discuss with anyone information about the items or answers in your exam (this includes posting or discussing questions on the Internet and social media websites).
- You may not seek help from any other party in answering items (in person, by phone, text or by email) during your exam (including breaks).
- You may not remove exam items and/or responses (in any format) or notes about the examination from the testing room.
- You may not copy or reconstruct exam items during or following your exam for any reason.

Test Administration
- You may not take the exam for someone else.
- You may not tamper with the computer or use it for any function other than taking the exam.
- You may not engage in disruptive behavior at any time during the exam.
- When applicable, you will be provided with scratch paper after entering the testing room. Writing on any materials other than the scratch paper is prohibited.
- If you experience hardware or software problems during the exam, notify the proctor immediately by raising your hand.
- Earplugs are allowed.
- Please refrain from asking the proctor about exam content and/or results.

Break Procedures
- You will be given the opportunity to take a ‘scheduled’ break after two hours, and again after three and a half hours of exam testing time.
- To request a break, or to exit the testing room for any other reason, raise your hand for the proctor and wait for the proctor approval.
- The exam clock will not stop while you are on a scheduled or unscheduled break.
Academic Integrity
Brookline College requires all students to conduct themselves and produce academic work in an ethical manner. Students are expected to conduct themselves at all times with the highest academic standards. Behaviors that constitute irregular behavior or misconduct include but are not limited to:

- Giving or receiving assistance of any kind.
- Using, accessing, or attempting to access any prohibited aids. Prohibited aids are any devices or materials that will be helpful in taking the exam. Examples of aids that are prohibited are electronic devices (e.g. cell phones, tablets, etc.), conversion tables, dictionaries, etc.
- Attempting to take the examination for someone else.
- Bringing any exam study aids (textbooks, notebooks, classroom notes, etc.) to the testing room or accessing or attempting to access such study materials at any time after the start of the examination administration, including break times.
- Failing to follow testing regulations or the instructions of the test proctor.
- Creating a disturbance of any kind.
- Tampering with the operation of the computer or attempting to use it for any function other than taking the examination.
